

SHRINKFAST

Innovators In Heat Shrink Tools

SHRINKFAST MARKETING RECEIVES EUROPEAN CE MARK APPROVAL FOR THEIR MODEL 998 HEAT TOOL

Newport, New Hampshire – August 4, 2008 – As the popularity of Shrinkfast heat tools grows worldwide, the model 998 achieved another milestone by gaining technical approval with the European CE Mark. The CE mark shows that the model 998 complies with the appropriate quality and safety standards and is another reflection of the Shrinkfast dedication to providing their customers with the best heat tools in the industry.

Now with both CE and UL[®] approval marks, the model 998 further solidifies Shrinkfast as the technical innovator and leader in the heat tool marketplace. “Having the ability to utilize the CE Mark further strengthens our international sales strategy,” said Michael Stenberg, President of Dr. Shrink, Inc., a leading distributor of Shrinkfast heat tools. “European customers understand and appreciate the significance of the CE certification and this is just another example of the high level of technical commitment on the part of Shrinkfast Marketing.”

Technical Features and Benefits:

Overall performance and reliability set the model 998 apart from the competition, with the following product features ensuring customer safety and efficiency:

- Cool Combustor even after extensive use
- Safety trigger shuts off the gas when released
- Powerful 212,000 BTUs for quick, economical shrink wrapping
- 2’, 4’ and 6’ extensions available for any wrapping requirement
- Lightweight 2.2 lbs-ergonomically designed for large shrink applications

Worldwide Representation:

Shrinkfast heat tools are sold around the world with over 100 full-service distributors. These distributors offer Shrinkfast heat tools along with the shrink film accessories to provide customers a complete service when wrapping any application. Shrinkfast heat tools are currently used in the following industries:
